DAY 1 – AWARENESS PROGRAM ON DRONE TECHNOLOGY

ANCHORING / HOSTING SCRIPT • 18 SEPTEMBER 2026 (FRIDAY)

Two-Anchor Format: Anchor 1 (Male) & Anchor 2 (Female)

09:30 – 10:00 AM

REGISTRATION OF PARTICIPANTS

Anchor 1: Good morning everyone! A very warm welcome to all the dignitaries, respected faculty members, distinguished speakers, and dear students present here today.

Anchor 2: We are delighted to have you all with us for Day 1 of the Awareness Program on Drone Technology.

Anchor 1: Today is going to be an exciting journey into a technology that is rapidly transforming the way we understand, monitor and interact with the world around us.

Anchor 2: From agriculture and environmental management to surveying, smart cities, remote sensing and autonomous systems — drones are no longer just flying machines. They have become powerful technological tools with applications across multiple domains.

Anchor 1: And today, we have an excellent lineup of experts who will help us understand not only how drones work, but also where they are taking us in the future.

Anchor 2: We request all participants to kindly complete their registration and take their seats.

Anchor 1: Once again, welcome everyone. We hope you have an informative, engaging and memorable day ahead.

10:00 – 10:30 AM

INAUGURAL CEREMONY — Welcome Address & Lamp Lighting

Anchor 2: Ladies and gentlemen, may we now request your kind attention as we formally begin today's program.

Anchor 1: It is said that every meaningful journey begins with a first step. And today, we begin our journey into the fascinating world of Drone Technology and UAV Ecosystems.

Anchor 2: To formally inaugurate this awareness program, we now move towards the Inaugural Ceremony and the traditional Lamp Lighting.

Anchor 1: May we request our esteemed Chief Guest, distinguished Guests of Honour, and respected University Officials to kindly grace the stage for the lamp-lighting ceremony.

Anchor 2: May we request everyone to join us in welcoming our dignitaries with a warm round of applause.

Anchor 1: The lighting of the lamp symbolizes the removal of darkness and the beginning of knowledge, wisdom and enlightenment.

Anchor 2: And what better way to begin a program dedicated to emerging technology than by lighting the lamp of knowledge.

> Stage Cue: May we request our dignitaries to kindly proceed with the lamp lighting. [Pause for ceremony]

Anchor 1: Thank you, respected dignitaries. Let us once again put our hands together for our esteemed guests.

WELCOME ADDRESS

Anchor 2: We now invite [Name/Designation of Welcome Speaker] to deliver the welcome address and formally welcome all our distinguished guests and participants.

Anchor 1: Sir/Ma'am, we request you to kindly address the gathering.

> Stage Cue: [Speech]

Anchor 2: Thank you so much for those warm and inspiring words.

10:30 – 10:45 AM

ABOUT IETE STUDENT FORUM (ISF) & PROGRAMME OBJECTIVES

Anchor 1: We now move towards understanding the platform behind today's student engagement — the IETE Student Forum, or ISF, and the objectives of this awareness program.

Anchor 2: To introduce us to the forum and give us an insight into its vision and the objectives of today's program, we invite the ISF Coordinator to kindly take the stage.

Anchor 1: Ladies and gentlemen, please welcome our respected ISF Coordinator with a big round of applause.

> Stage Cue: [Session]

Anchor 2: Thank you, Sir/Ma'am, for giving us a clear perspective on the objectives of the program and the role of the IETE Student Forum.

10:45 – 11:30 AM

SESSION I — Fundamentals of Drone Technology and UAV Ecosystem

Speaker: Prof. Abhay Kumar

Anchor 1: Now, we come to our first technical session of the day.

Anchor 2: Before we explore what drones can do, it is important to understand what lies beneath their flight — their fundamentals, components, systems and the larger UAV ecosystem.

Anchor 1: To take us through “Fundamentals of Drone Technology and UAV Ecosystem”, we are privileged to have with us Prof. Abhay Kumar from University Polytechnic, BIT Mesra, Ranchi.

Anchor 2: Sir, we warmly invite you to the stage to enlighten us on this fascinating subject.

Anchor 1: Ladies and gentlemen, please give a huge round of applause for Prof. Abhay Kumar!

> Stage Cue: [Session]

Anchor 2: Thank you, Sir, for that insightful session.

Anchor 1: I am sure we now have a much stronger foundation for understanding the technology that powers modern UAVs.

11:30 – 11:45 AM

TEA BREAK

Anchor 2: And now, it is time for a short refreshment break.

Anchor 1: We request everyone to kindly make use of the tea break and return to the venue by 11:45 AM, as we have another exciting technical session waiting for you.

Anchor 2: Enjoy your tea, and please don't wander too far — our drones are waiting for us!

Anchor 1: We'll see you back here at 11:45.

11:45 AM – 12:30 PM

SESSION II — Drone Architecture, Flight Controllers, Sensors & Communication Systems

Speaker: Mr. Abhinav

Anchor 1: Welcome back, everyone!

Anchor 2: We hope you're refreshed, because we're now moving from the fundamentals into the architecture and working systems of drones.

Anchor 1: Our next session focuses on Drone Architecture, Flight Controllers, Sensors and Communication Systems.

Anchor 2: And to guide us through these important aspects, we are pleased to welcome Mr. Abhinav, a GIS and Project Management professional with more than 8 years of industry experience and a DGCA-certified Drone Instructor.

Anchor 1: His professional expertise covers GIS, Remote Sensing, Drone/UAV Surveying, LiDAR, GPR, Bathymetry, Photogrammetry and geospatial data analysis, making him particularly well suited to take us deeper into the world of drone technology.

Anchor 2: He has also worked on infrastructure and environmental projects involving organizations such as L&T, NHAI, BSNL, BRO, BIT Mesra and the Government of Jharkhand.

Anchor 1: So, without taking any more time, let's welcome Mr. Abhinav.

Anchor 2: A very warm round of applause, please!

> Stage Cue: [Session]

Anchor 2: Thank you, Sir, for such an informative session.

Anchor 1: The way you've connected the technical components of a drone with their practical functioning has certainly made the subject much more understandable.

12:30 – 01:15 PM

SESSION III — DGCA Drone Rules, Digital Sky Platform, Safety & Ethical Operations

Speaker: Mr. Abhinav

Anchor 1: We now continue with our next session with Mr. Abhinav.

Anchor 2: Technology becomes truly meaningful only when it is used safely, responsibly and ethically.

Anchor 1: Our next session will focus on DGCA Drone Rules, the Digital Sky Platform, Drone Safety and Ethical Operations.

Anchor 2: This session is particularly important for anyone who wishes to pursue drones professionally, because understanding the technology is only one part of becoming a responsible drone operator.

Anchor 1: Sir, we once again invite you to continue the session and share your expertise with us.

> Stage Cue: [Session]

Anchor 2: Thank you, Sir, for highlighting the importance of safety, regulations and responsible drone operations.

Anchor 1: That was indeed an essential session for every aspiring drone enthusiast.

01:15 – 02:00 PM

LUNCH BREAK

Anchor 2: And now, we have reached our lunch break.

Anchor 1: We request everyone to kindly enjoy the lunch and return to the venue by 2:00 PM sharp.

Anchor 2: Because the second half of today's program is going to take us into some extremely interesting real-world applications of drone technology.

Anchor 1: Enjoy your lunch, everyone. See you at 2 PM!

02:00 – 02:45 PM

SESSION IV — Applications of Drone Technology in Agriculture & Soil Management

Speaker: Dr. Sazya Firdaus

Anchor 1: Welcome back, everyone!

Anchor 2: We've learned how drones are built, how they communicate, and the importance of operating them safely. Now comes one of the most exciting questions: “Where can we actually use them?”

Anchor 1: And our next session takes us into one of the most important areas — agriculture and soil management.

Anchor 2: It is our privilege to welcome Dr. Sazya Firdaus, an accomplished academic and Associate Professor/Program Leader with over 13 years of experience in biotechnology and environmental science.

Anchor 1: Her expertise includes Environmental Management, Bioinstrumentation and GIS, and she has also been actively involved in research related to soil bioremediation and remote sensing in agriculture.

Anchor 2: Her experience in academic leadership, student mentorship and innovative teaching makes her an excellent person to guide us through the intersection of technology, environment and agriculture.

Anchor 1: Ma'am, we are delighted to have you with us.

Anchor 2: May we request Dr. Sazya Firdaus to kindly take the stage.

Anchor 1: A warm round of applause, everyone!

> Stage Cue: [Session]

Anchor 1: Thank you so much, Ma'am, for that enlightening session.

Anchor 2: Your insights have beautifully demonstrated how technology can contribute to smarter and more sustainable agricultural practices.

02:45 – 03:15 PM

SESSION — Applications of Drone Technology in Smart Cities

Speaker: Dr. Sazya Firdaus

Anchor 2: We now continue with another fascinating application of drone technology — Smart Cities.

Anchor 1: From mapping and monitoring to infrastructure and environmental management, drone technology has the potential to become an important part of tomorrow's urban ecosystem.

Anchor 2: To explore this further, we once again invite Dr. Sazya Firdaus to take us through the applications of drone technology in smart cities.

Anchor 1: Ma'am, the stage is yours.

> Stage Cue: [Session]

Anchor 2: Thank you, Ma'am, for sharing those valuable insights.

Anchor 1: That session certainly gave us a glimpse of how aerial technology can contribute to the cities of the future.

03:20 – 04:00 PM

SESSION V — AI, IoT, GIS, Remote Sensing & Autonomous Drone Systems

Speaker: Dr. Ratnesh Mishra

Anchor 1: Ladies and gentlemen, we are now entering a session where several powerful technologies come together.

Anchor 2: Artificial Intelligence. Internet of Things. GIS. Remote Sensing. And Autonomous Systems.

Anchor 1: Together, these technologies are changing the possibilities of what drones can achieve.

Anchor 2: To take us through “AI, IoT, GIS, Remote Sensing and Autonomous Drone Systems,” we are honoured to welcome Dr. Ratnesh Mishra, Assistant Professor in Computer Science at BIT.

Anchor 1: Dr. Mishra holds a Ph.D. in Computer Science and Engineering, M.Tech in Software Engineering, MBA in IT and B.E. in Computer Technology.

Anchor 2: He brings with him 20 years of teaching experience, along with research experience, and his professional expertise includes Computer Networking, Website Development, Internet & Intranet.

Anchor 1: His research interests also include Network Security, Cryptography, IoT & Cloud Computing, Machine Learning and Data Mining.

Anchor 2: With such a strong background in computing, networking, IoT and machine learning, we are sure this session will give us a fascinating perspective on the intelligent and autonomous future of drones.

Anchor 1: Sir, we are honoured to have you with us.

Anchor 2: Please welcome Dr. Ratnesh Mishra with a huge round of applause!

> Stage Cue: [Session]

Anchor 2: Thank you very much, Sir, for that insightful and engaging session.

Anchor 1: The connection between AI, IoT, GIS and autonomous drone systems truly shows us that the future of drones is not simply about flying — it is about intelligence, data and decision-making.

04:00 – 04:30 PM

CAREER OPPORTUNITIES — Drone Certification & Entrepreneurship

Speaker: Prof. Abhay Kumar

Anchor 1: And now, we come to a session that is particularly important for all the students sitting here.

Anchor 2: Because learning a technology is one thing... But turning that knowledge into a career is another.

Anchor 1: Our next session focuses on Career Opportunities, Drone Certification and Entrepreneurship.

Anchor 2: This is where today's learning can connect with tomorrow's opportunities.

Anchor 1: To guide us through the career possibilities and opportunities in the drone ecosystem, we once again invite Prof. Abhay Kumar, University Polytechnic, BIT Mesra, Ranchi.

Anchor 2: Sir, we request you to kindly take the stage and guide our students.

> Stage Cue: [Session]

Anchor 1: Thank you, Sir, for giving us such valuable insights into the career opportunities available in the rapidly developing drone industry.

Anchor 2: We hope our students leave this session not only with knowledge, but also with new ideas, ambitions and possibilities.

04:30 – 05:00 PM

INTERACTIVE SESSION, FEEDBACK & DAY 1 CLOSING

Anchor 2: And now, before we conclude Day 1, we want to hear from you.

Anchor 1: Because an event becomes meaningful not only through what the speakers share, but also through the questions, curiosity and feedback of the audience.

Anchor 2: We now begin our Interactive Session and Feedback Round.

Anchor 1: We encourage all the participants to share their thoughts, ask questions and tell us what they found most interesting or useful throughout today's sessions.

> Stage Cue: [Interactive session]

DAY 1 CLOSING

Anchor 1: As we come towards the end of Day 1, let's take a moment to look back at our journey.

Anchor 2: Today, we started with the fundamentals of drone technology...

Anchor 1: ...then explored drone architecture, flight controllers, sensors and communication systems...

Anchor 2: ...understood DGCA rules, safety and ethical operations...

Anchor 1: ...discovered applications in agriculture, soil management and smart cities...

Anchor 2: ...explored the combination of AI, IoT, GIS, Remote Sensing and autonomous systems...

Anchor 1: ...and finally discussed career opportunities, certification and entrepreneurship.

Anchor 2: So, if there's one thing we can take away from today, it is this:

> **“The future of drones is not just in the sky — it is in the data, ideas and opportunities they bring to the ground.”**

Anchor 1: On behalf of the organizing committee, we extend our heartfelt gratitude to our esteemed Chief Guest, Guests of Honour, University Officials, distinguished speakers, faculty

members and every participant who made today's program possible.

Anchor 2: A special thank you to Mr. Abhinav, Dr. Sazya Firdaus, Dr. Ratnesh Mishra and Prof. Abhay Kumar for sharing their knowledge and valuable experience with us.

Anchor 1: We also thank the organizing committee, coordinators and volunteers whose efforts behind the scenes made today's program a success.

Anchor 2: And finally, a big thank you to all the students and participants for your enthusiastic presence and participation.

Anchor 1: We hope today's sessions have inspired you to look beyond the technology itself and explore the opportunities that lie within it.

Anchor 2: With that, we officially conclude Day 1 of the Awareness Program on Drone Technology.

Anchor 1: Thank you for being such a wonderful audience.

Anchor 2: Have a great evening, and we look forward to seeing you again for the upcoming sessions.

Both: Thank you, and have a wonderful day!
